Introduction

Magento 2 MageMob Inventory extension is used to manage inventory of products. It manages stock in/stock out of products, keeps a track of suppliers, purchase orders, pending products, orders, stock received, purchase invoice, barcode and history of product's inventory. It reduces the amount of time and efforts taken to manage inventory of several products at once.

Note: This extension works on the default inventory configuration settings of Magento 2. Manage Stock option must be set to 'YES'.

Benefits of MageMob Inventory

Inventory management is a good practice for any company. But the way you handle it can either make or break your business. If you do not keep a watchful eye on your inventory or count your stock regularly, you are setting yourself up for potential inventory errors and challenges. Keep the following benefits in your mind as you weigh the costs of not implementing an inventory management strategy:

- It improves the accuracy of inventory orders and helps you to figure out how much inventory you need to have on hand.
- Leads to a more organized warehouse. You can also manage stock quantity warehouse wise.
- This extension saves your time and money. It also gives you real time updates and monetary benefits.
- MageMob Inventory lets admin manage warehouse stock details while placing sales orders.
- It's a fact that a good Inventory Management will help you hold the customers. The customers will visit your store again, if you provide timely deliveries.
- With MageMob Inventory, you can have a Warehouse Management facility in your inventory system.
- The barcode scanning module integrated in this system helps you to scan the barcode of products and also enter a unique barcode on your own. The Barcode scanning devices can be configured with the system help eliminate the manual process so that your employees can focus important areas of your business.

Installation & Activation

Manual Installation (Installing Magento 2 extension by copying code)

Step 1:

For Windows OS:

- Go to <your Magento install dir>/app/code. Under that, create the folders using following hierarchy:
 - Biztech
 - MageMob Inventory

For Linux OS:

- Enter the following commands keeping their order:
 - `cd <your Magento install dir>/app/code`
 - `mkdir -p Biztech/ MageMob Inventory`
- After this, find the Download Zip and extract all files and folders in Biztech/ MageMob Inventory.

Step 2:

- After the successful installation you have to run the command on Magento2 root directory - “php bin/magento setup:upgrade”.
- If you see blank page or permission error, go to Terminal (Linux)/ Command Prompt (Windows).
 - `cd [magento root directory][var]`
 - run the following command
 - `$ chmod -R 777 *`

Step 3:

- After running the command, log into the admin panel and clear the Cache. Go to **SYSTEM -> Tools (section) -> CACHE MANAGEMENT** to clear the cache.

Cache Management

Flush Cache Storage
Flush Magento Cache

13 records found

☐	Cache Type	Description	Tags	Status
☐	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	DISABLED
☐	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	DISABLED
☐	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
☐	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
☐	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
☐	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
☐	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
☐	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED

Step 4:

- After successful installation, you can see the “MageMob Inventory” under BIZTECH tab inside **STORES -> CONFIGURATION**.

Installation via Composer

Step 1:

- Install composer from this link. If you already installed composer, skip this step.

Step 2:

- Go to **app -> code -> Biztech -> MageMob Inventory**, right click on composer.json and select use composer here.

Step 3:

- After that you can see command prompt where you have to run the following command:
 - `composer update`

Step 4:

- Now go to [Magento root directory] and right click on use Composer here.

Step 5:

- You can see the cmd window and run the following command here:
 - php bin/magento setup:upgrade

Step 6:

- After running the command, log into the admin panel and clear the Cache. Go to **SYSTEM -> Tools (section) -> CACHE MANAGEMENT** to clear the cache.

Step 7:

- After successful installation, you can see the “MageMob Inventory” under BIZTECH tab inside **STORES -> CONFIGURATION**.
- The installation is successful! Scroll down to activate the extension.

Extension Activation

Copy an activation key

- Copy the activation key from the Order Confirmation Mail. OR
- Log into your account at www.appjetty.com using the email and password you have provided at checkout process.
- Go to Downloadable Options and copy the activation key for the **MageMob Inventory** extension.

Activate the extension

- Log into Magento Admin Panel and go to **Stores -> Configuration -> Biztech -> MageMob Inventory** and enter the activation key in the '**Activation Key**' field for the MageMob Inventory extension then click the '**Save Config**' button.

Select Websites

- When you enter and save the key it will be verified and you can select the websites where you need to use the MageMob Inventory extension. Click on '**Save Config**' button after making your selections.

The screenshot shows the 'Inventory System Activation' configuration page. At the top right is an orange 'Save Config' button. The page title is 'Inventory System Activation' with a collapse icon. Below the title, there is a label 'Activation Key' with '[website]' underneath it, followed by a text input field containing a blurred activation key. Below that is a label 'Select Websites' with '[store view]' underneath it, followed by a checked checkbox and the text 'Main Website'.

- Now, MageMob Inventory Extension got activated! You just have to set configurations.

How it Works?

Back End Configuration

Please follow the below steps to configure **MageMob Inventory** extension.

- Go to **Stores -> Configuration**
- From the left column navigate to **Biztech -> MageMob Inventory**.

Enable Extension & General Extension Configurations

- To enable the extension select '**Yes**' from the '**Enabled**' dropdown list under '**Enable Extension**' tab.
- To show all the suppliers in Purchase Order Creation select '**Yes**' from the '**Show all Suppliers in PO Creation**' dropdown list under '**Select Supplier**' tab.

Inventory Log

- To manage the Inventory History, go to **MageMob Inventory -> Inventory Log**. Now a grid of products altered using any action will be displayed.
- The quantity of products altered will be traced and displayed in this grid. From this grid admin can have overview of the product quantities whether it is increased or decreased. It will keep a track from where & how much quantity of any product is altered.
- Warehouse transaction log can also be viewed from this grid by which admin can track the warehouse transactions as well. Admin can also Sort or Search the records as per the provided filters for the fields in the grid.
- Thereafter to delete the Transaction logs select the record and choose **'Delete'** from **'Actions'** dropdown list and click on **'Submit'** button.

Points to Note

- Products in all the modules of MageMob Inventory will only be visible if they are assigned to the website selected while purchasing the Extension.
- Limit of quantity of product to be out of stock is configured from Magento admin.
- In Pending orders, only those sales orders will be displayed which are placed from the store/website selected at the time of purchasing Extension.
- If same products are there in more than one pending orders selected for generating purchase orders, then you can remove the product from selection otherwise it will take the average of the unit cost entered for that product based on the summation of the required quantity entered.
- Default warehouse will be added automatically on activation of MageMob Inventory.

FAQ

General FAQ

1. Do I need to install anything on Magento 2?

Ans: Yes, you need to install the “MageMob Inventory” extension on Magento 2.

2. Do you provide demo?

Ans: Yes, demo is worth a thousand words. You can view the demo details and video on our store page.

3. Will I be able to upgrade it from a lower plan to a higher plan?

Ans: Yes, you can upgrade it, - by paying the balance amount.

4. Do you provide installation service?

Ans: Yes, we do provide the installation service. You can tick the installation service checkbox while purchasing or can transfer the mentioned amount to our PayPal account payments@biztechconsultancy.com later on.

5. Can I edit the extension?

Ans: All our extensions are 100% open source. You can customize the extension except the file containing our license code.

6. What if I get an error message after the installation of extension Or 404 Error Page not found, after installing extension?

Ans: No need to worry. Just log out of your Magento admin panel and login in again.

7. Can you customize the extension and app as our store needs?

Ans: Yes, we do customize the extension and app as per your need. This requires extra effort and estimation.

8. Do you have a refund policy?

Ans: Yes, you can refer our refund policy @ <https://www.appjetty.com/refund-policy.htm>. We stand behind the quality of our extensions with a 15-day money back guarantee.

Technical FAQ:

1. Is it mandatory creating a default warehouse for products?

Ans: No, once you install our extension, a default warehouse will be created and the products thereafter will be assigned to this primary warehouse if the warehouse is not specified.

2. Is there a way out to see who updated the product quantity?

Ans: Yes, we have a module called “Inventory log” which will provide you the following information:

- Product SKU (which product’s quantity has been altered)
- System action (quantity has been altered using which action)
- Action type quantity has been increased or decreased)
- Product’s quantity before and after the action
- Processed date
- Interface (mobile or desktop)
- User.

3. What is the difference between “Pending Products” and “Pending Orders”?

Ans: Pending products will list the products which are “Out of Stock” and need to order them from supplier to get them back in stock. Pending orders will list the orders which are backordered and you need to purchase from supplier to fulfill the sales orders.

4. Can single purchase order have multiple stocks received?

Ans: Yes, as we allow partial delivery, single PO can have multiple SR.

5. Is it possible to create purchase order for different suppliers at a time?

Ans: Yes, you can select multiple suppliers in the PO generation at a time. But PO for multiple suppliers will be generated different.

6. What if the unit cost changes (increases/decreases) when stock is received against PO?

Ans: We do have a provision to enter the unit cost while the stock is received. You can also enter the shipping cost if any.

7. I have multiple stocks received for single purchase order. Is it allowed to create purchase invoice for each stock received?

Ans: No, purchase invoice will be created per purchase order.
